### PP-Random Copolymer Extrusion

| Grade Name | MFR(gr/10min)<br>(5kg,190OC) | Properties                                                                                                   | Application                                                                                                                                                                                                        |
|------------|------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ARP230     | 0.2                          | High heat and extremely high extraction stability.                                                           | Sanitary pipes for cold & hot water, industrial and chemical pipes. Other applications are pipe fittings and profiles.                                                                                             |
| EP2X83CE   | 1.8                          | Excellent clarity and gloss.                                                                                 | Bottle for detergents and toiletries, flat mineral water, jars for condiments and preserves.<br>Film for packaging & sheet for stationery folders and displays.                                                    |
| RP210G     | 1.8                          | High cracking and chemical resistance.                                                                       | Extrusion blow molding of high gloss monolayer bottles, packaging of cosmetics, detergents, chemicals and food-stuffs.                                                                                             |
| RP240G     | 1.8                          | Low flow with a conventional MWD and is specially formulated with an additive package that enhances clarity. | Blow-molded articles, extruded sheet and profiles with good melt strength, excellent clarity, excellent gloss and good regrind stability.                                                                          |
| RP270G     | 1.8                          | High transparency and gloss, excellent processability & can be converted on form-fill-seal equipment.        | Blow molded medical articles. transparent bottles & containers for blood, intravenous solutions, pharmaceutical solutions, medicines & salves. Packaging for health care products. Film & sheet for thermoforming. |
